THERMOFORM PACKAGING

For Ultrium LTO Tape Cartridges

FEATURES + BENEFITS

POLYETHYLENE CONSTRUCTION - Blended polystyrene material has incredible strength and thermo-stability characteristics and will not shed like cardboard, reducing the potential for cartridge contamination.

DURABLE FORM-FITTED TRAYS - The form-fitted tray design holds cartridges snugly in place and significantly reduces the amount of G-force reaching the cartridges if rough handling is encountered in transit. The trays also nest together, efficiently stacking to save valuable floor space.

RECYCLABLE - Imation's environmentally friendly thermoform package contains can be recycled after use.

INCREASED DATA CENTER EFFICIENCY

Introducing Imation Thermoform Packaging, designed to provide the ultimate protection of your high capacity LTO Ultrium 1, 2, 3, 4 & 5 cartridges during transport. The thermoform package is made from environmentally-friendly, recyclable material, which yields a durable clean package that helps ensure the cartridges you receive are undamaged and ready to load. Unpacking is incredibly fast and efficient, saving significant time and resources.

LTO technology is a powerful, scalable, adaptable open tape format developed and continuously enhanced to help address the growing demands of data protection in midrange and enterprise-class server environments. As this technology advances to include smaller particles, more data tracks and greater tape capacity, the sensitivity of these cartridges increases as does the need to protect them during transport. With Imation's Thermoform Packaging your sensitive high capacity cartridges are secure and well protected.
